Project Name	EduGenie Google Gemini Powered Learning Assistant
Maximum Marks	2 Marks

Data Flow Diagram

Create a Data Flow Diagram (DFD) to show how data moves through your system - between external entities, processes, and data stores. Use the symbol legend below as a guide.

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	External Entity	Student / Self-Learner who interacts with EduGenie by asking questions, requesting quizzes, summaries, or learning roadmaps.
Rectangle with numbered header	Process	Activities performed by the system such as receiving the user request, processing it through the FastAPI backend, communicating with the Google Gemini API, and generating AI-powered educational responses.
Rectangle (solid fill, no number)	Data Store	Stores user queries, generated responses, quiz history, learning progress, and interaction logs (optional).
Labeled arrow	Data Flow	Represents the movement of data such as user questions, AI prompts, generated answers, quizzes, summaries, and personalized learning recommendations between entities, processes, and the data store.

Example

The diagram below illustrates how the symbols above come together to form a complete data flow diagram.
